WORK EXPERIENCE

Sr. Developer React

AKQA Melbourne, AU, May/2019 to Present

- At AKQA I am working as a Sr. developer for Bunnings where I am extensively working on React, Redux, SiteCore and Azure API gateway this is the transition for Bunnings to be an ecommerce marketplace and also transitioning towards React and API based state less development. Bunnings is the third largest marketplace in Australia.

Tech Lead (Full Stack)

Sapient London, UK, 2015-2019

- I am the Lead Developer at Lloyds Banking Group UK to produce the APIs for PSD2 Open Banking Regulations where I have been working on Node and React. I not only lead my development team of 5 people but was the key liaison with the project's owners and the IBM Services on-site team. The work I lead allowed LBG to be one of three CMA9 banks to deliver before the regulations required.
- we Developed a Hybrid Mobile App using the IONIC, Apache Cordova and Angular Frameworks for Ned Bank.
- I have worked as a Web and Mobile Frontend Developer for Diageo, HNM, Hartford and VOYA Finance. These projects were made up of between 8 and 20 developers.

Frontend Developer

Info Edge, 2013-2015

- I was a key team member of the Largest Product team (Naukri) where I started as a Frontend developer mostly working on native javascript.
- Build a library along with other team members which was just like a JQuery named NGQuery.
- I was the very first person who introduced Grunt, SASS, and JASMIN which helped to improve their code quality also get Naukri Rock Star Award for the same.
- I have build the First Naukri (<https://www.firstnaukri.com>) mobile site.
- I have implemented a Form builder library to enable any layman to create their own forms and online tests which reduced a repetitive task to create an online test for our client so now they can create their own test papers.

INITIATIVES

- I was an early member of a Startup that produced a system to allow users to track aspects of your car. This included Speed, Window, AC, Current State of Fuel and it allowed you to stop the engine of your vehicle at any time.
- Recently Completed the DevOps Training which includes (Jenkins, UCD, Ansible, Docker, Kubernetes, Bluemix).
- Participated as a trainer for FE to BE and BE to FE Full Stack Development Course running in Sapient UK
- A certified interviewer for the Sapient UK.
